[A SPANISH-ENGLISH BILINGUAL COLUMN...SPANISH VERSION HEREIN OMITTED]

**Aquarius:** The latest trend? Only if you put your own spin on it! Use aqua, electric blue, orchid, and amethyst to play up your oddball sense of style, especially with a pair of crazy socks or an ankle bracelet. Lately your mind is away from the computer and off in space.

**Pisces:** So emotional, especially in mid September. The gentle colors of purple, amethyst, white, or sea-green can provide soothing relaxation. Treat your feet to a foot spa or a sea-treatment rub. You'll feel ready for anything by November. 2006 will be a super year for you!

**Aries:** Strong, bright colors like red, copper, and geranium suit your fiery temperament. Emphasize the head with hair ornaments. Autumn is very supportive. Whatever was started in Spring 2004 is completed by mid-October.

**Taurus:** Rich, pleasing colors like pink, pale blue, green, sapphire, rose, crystal, and violet bring out your creative best, especially worn around your throat. October can be busy but mixed; November slows things down.

**Gemini:** Use turquoise or lemony-yellow shades on wrists or ears to highlight your lively energy. It's fun to talk and socialize through September. Relationships are important in early December.

**Cancer:** Soft iridescent colors like opal, silver, smoky gray, and pearl suit your moods. Do you dare put powder on your cleavage? Problems are disappearing. So many unusual new opportunities, especially in November!

**Leo:** Wear something dramatic near your heart. Orange, yellow, topaz, and gold would feel good, even some bling-bling. There's a little too much work on your plate now, and you can use a lift.

**Virgo:** Help make someone's life better. Get serious for that interview in blue, navy, brown, or dark gray. Expect the unexpected this Fall, but take an antacid if your insides need settling.

**Libra:** Feminine all the way! Peach, pink, pale blue, copper, and sapphire compliment your look. A delicate scarf is so fashionable! 2005 was a wonderful ride, and gets even better after October.

**Scorpio:** Intense is the ward! Black, smoke, garnet, ruby, dark red and maroon will add to your sex appeal. Leather looks good on you. By November, your stars are shining and luck is in your corner, even if you owe money.

**Sagittarius:** December highlights travel. Go somewhere you haven't been. .or at least read about it. Hips are fashion-forward now, so wear a law-slung belt of indigo, purple, or royal blue. Have fun!

**Capricorn:** Your serious side loves the earth-tones of olive, black, dark gray, hunter green, brown, and stone, so bring attention to your knees with tall boots or long stockings. Inner changes will soon bring financial growth.
