**Aquarius:** New interests bring fantastic understanding. Study astrology online! You have some big questions, like, what do you want, and whom can you rely upon? Be cool and start your own trend. You are in demand at the office, but overworked. The good news you're waiting for can be delayed. Pay off any debts.

**Pisces:** Will the changes ever end? It's been hard to keep up. Your faith is strong, but you need a rest. Recharge your spiritual batteries by getting creative. A partner needs less attention now. You can start earning more—maybe through government, school or travel jobs. Begin a dream journal.

**Aries:** This is a time for your special quality of pioneering courage to start to shine. Be tougher and steadier than ever before. Wear bold red to show your confidence! You feel stirred and open to new directions. A job matter wraps up. Luck's on your side in receiving money that's owed.

**Taurus:** Pressures require adjustments? Perhaps about school or travel? But your love life is highlighted. You can meet someone new, and you're feeling inspired, but there are obstacles and hidden problems. Wear sensual velvet to feel luxurious. You may need to overcome creative blocks.

**Gemini:** On the one hand, there's a great new job; on the other, a fun lift to your social life. Wear yellow to brighten things up more! Matters at home must be concluded. Talk everything over. You are feeling more spiritual, yet rethinking your beliefs. In between multitasking, try meditation.

**Cancer:** It's a strange time? You may want to write down your moods in a diary. The sound of running water can be helpful, but you may feel swamped by constant emotions. Sunshine and Vitamin D can help. Be open to new experiences, and trust your intuition. A career path blossoms.

**Leo:** Now is a period of growth, but confusion and dreaminess too. If you are too trusting, you might have to face a "reality check." Self-discipline is required. Is your income sufficient? Balance your checkbook! It's a wonderful time to take a course or fix up your home. A gold mirror will add drama!

**Virgo:** You will have to push forward during many unexpected changes, but your practical work ethic helps a lot. Put aside issues about appearance? Concentrate on budget and savings. Practice breathing exercises. Pick up some elegant new stationery. It's a good time to buy or sell a car.

**Libra:** You are finding a new way to deal with relationships, even though some may not last long. You are so much more "together" now, you might want to say goodbye to your therapist or guidance counselor for a while! Artistic and sensible, you increase your earnings. Light a lavender floral candle to relax.

**Scorpio:** Are your friends trustworthy? Focus on personal growth and interesting choices. A more powerful new you is developing, so take things step by step to deal with disappointments. Avoid weight gain, and work at improving your health. If you must indulge, a sugar-free chocolate should do it!

**Sagittarius:** Wow—of all the signs, you are ready for the most transformation! Spiritual but grounded, you can put your philosophy to the test during unexpected circumstances. It's a time of fun and adventure. Put your career on hold to travel and search. Wear dangling earrings just for the fun of it!

**Capricorn:** You feel strengthened by exciting changes and positive ideals, but are you reaching success fast enough? Friends can really help if you feel tired and frustrated. Answers are close to home, not far away. Simplify your schedule. Show you mean business by wearing something with a classy label.
